To Whom It May Concern

This is to confirm that our company has purchased an Ultralight Airplane Sting S4 from your company in June 2015.

We have quite a bit of experience with UL-planes and are able to compare the quality of your product with others, f.ex. CT & FK. We are happy to certify, that the Sting S4 shows an outstanding quality in any respect.

In total the plane provides a solid, valuable and longlasting impression. The material composition of the cabin installation is elegant and of excellent quality. There are no sharp edges, visible plastic parts are in Carbon Fiber optics, panel surface in leather. Seats are very comfortable, the rudder and break pedals easily to adjust. One little item shows, that TL engineers knows their user needs: The airpressure check on the tyres is always a problem with the wheel covers on. TL has a perfect solution to make this necessary check as easy as possible. We haven't seen such solution in any other Ultralight.

Another positive comment must be given to the service of TL. An unforeseen challenge was settled by immediate assistance as well by TL's technical as also by their administrative department.

TL may feel free to show this reference at any occasion.

Sincerely,  
China Business Services & Co. k.s.

Hubert Ernst
